

Dealing with complexity

Goal

The human being can observe without tool a maximum of 4 interacting factors in a system. Planning and decision-making regularly deal complex challenges where far more than 4 factors are involved. This workshop provides daily applicable possibilities to identify and display Cause-effect relations.

Principal training topics

Idea-development, Process analysis, Project work, Strategy development and forecast.

Methods

Introduction of qualitative and possible quantitative cause-effect modeling techniques using the software CONSIDERO MODELER as well as holistic thinking training referring to concrete examples from participants.

Duration

1 day

Date

27. April 2009

28. September 2009

Place

IMIG AG, Poststraße 35-37, 71229 Leonberg

Price

1.490 Euro zzgl. gesetzl. MwSt.
