Lean Methods

5S, 7 Wastes, TPM, SMED

Best Practice Workshop in

ArvinMeritor[™]

In this workshop you will know the origin of the idea and the first bases of the Lean philosophy. Your awareness for recognition of wastes is sharpened and trained through exercises and practical examples. You will know effective methods for avoiding wastes. The visit to the Arvin Meritor plant completes the workshop and gives you a live experience Best Practice Example.

- Origin and Development of Lean
- Lean Philosophy
- Value creation - 7 wastes
- Identify and describe waste
- Representation of the potentials
- 5S-campagne advantages of standardization
- SMED and TPM foundations for the realization of the Lean philosophy
- Structured problem solving, deming circle (SDCA / PDCA)
- Success control by Visual Management
- Successful involvement of employees in the Lean process

7 + 1 Arts of waste
